-eer, *suffix* 1. Add:

The spelling *-eer*, replacing the older *-ier*, became frequent in the early 17th century. *Moun-taineer* and *Waistcoater* (a prostitute) afford early instances, and are also exceptional examples of the use of this suffix. A few formations denote inanimate objects, as *gazetteer* (1704), *nuffineer* (1806-7).

In the latter part of the 17th century gerundial and (to a less extent) participial formations on agent-nouns in *-er* appeared, and increased in the course of the following century, as *auctioneering* (1733), *buccaneering* (1703), *electioneering* (1750), *engineeering* (1720), *parliamenteering* (1711), *privateering* (1664), *volunteering* (1691). These, being formed directly on the sb. in *-er*, do not necessarily imply the existence of a corresponding infinitive or finite verbal form, though an early example actually appears in *mutineered* (1682). Some of these formations, e.g. *parliamenteering*, were in commoner use than the original sb.; occasionally, as in *revolutioneering*, no sb. exists, *-eering* itself being used as a suffix.

-eer, suffix 2, representing Du. *-eren*, ad. F. infinitive ending *-er*; as in *domineer* (Shakspeare), ad. Du. *domineren*, ad. F. *dominer* to DOMINATE; *commandeer* (1881), ad. Cape Du. *commanderen*, ad. F. *commander* to COMMAND.

Thomson, is opposite in iron to what it is in copper or zinc. 1894 *Ibid.* 563 Kerr's Effect. Dr. Kerr showed in 1877 that a ray of polarized light is also rotated when reflected at the surface of a magnet or electromagnet. 1904 R. M. WALMSLEY *Electr. They came with 'extension bags filled with samples. 1902 *Nature* 17 July 220/1 The replacement of the back component by a lens of greater focal length, increasing the focal length of the objective by about 50 per cent. we referred to some time ago, the alternative back lens being known as an 'extension lens'. 1851 C. CIST *Cincinnati* 202 One of the remarkable articles... is an 'extension table. 1864 [in Dict.] 1876 J. S. INGRAM *Centen. Expos.* xi. 332 From Crete, Illinois, we saw some very handsome extension-tables, the extra leaves of which were packed away in grooves in the legs when not in use. 1893 KARE D. WIGGIN *Polly Oliver* v. 53 The dining-room just holds, by a squeeze, the extension-table and four chairs. 1887 *Tourge Dutton's Inn* 92 A comfortable 'extension top might be raised at will to protect the driver from sun or storm.

Extensionally (ekstē'nʃənəlī), adv. [see -LY ².] By way of extension.

1903 *Nature* 3 Sept. 411 A class may be defined either extensionally, by an enumeration of its terms, or intensionally, by the concept which denotes its terms.

Extensionless (ekstē'nʃənəls), a. [-LESS.] Without extension.

Extensive, a. Add: 3. d. *Econ.* Applied to methods of cultivation in which a relatively small crop is obtained from a large area at the minimum of attention and expense: opposed to **INTENSIVE** a. 5. 1832 (see **INTENSIVE** a. 5).

Extensometer (ekstensəm'itər). Also -imeter. [f. L. *extensus*, pa. pple. of *extendere* to EXTEND + -OMETER.] An instrument for measuring the alteration of form of a bar of metal under the influence of temperature or stress.

1887 *Proc. Physical Soc.* VIII. 123 Screw-Micrometer Extensometer. 1902 *Encycl. Brit.* XXXIII. 10/1 Extensometers, or apparatus for observing the small deformation which a test-piece in tension or compression undergoes before its limit of elasticity is reached.

Extent, sb. Add:

7. **Campanology**. See quot. 1904.

1904 *Bulwer Gloss. Techn. Terms* 14 *Extent*.—(a) The full number of distinct 'changes', of which a 'method' admits, is the 'extent' of the 'method'. (b) The full number of times a bell, or some definite combination of bells, can occupy a given position, without repetition of any one of the 'changes' containing such bell, or bells, in that position. 1928 *Daily Tel.* 27 Nov. 10/7 Three 'extents' (i.e. 720 changes each) upon the six large bells there, in three different methods, 2,160 changes in all.

Exterior, a. and sb. B. sb. Add: l. b. An outdoor scene; a cinema picture made out of doors.

Externalist. Add: b. One who believes in the external origin of certain forms of skin disease.

1902 *Encycl. Brit.* XXXI. 568/1 The German school, most of its leaders being pupils of the great Hebra, tend to look to external irritants as the cause of the great majority of diseases, and they are often described as 'externalists'.

Extero-ceptive (ekstē'ro:ptiv), a. *Physiol.* [irreg. f. L. *exterius* exterior + -ceptive of **RECEPTIVE**.] (See quots.) Also **Extero-ceptor**.

1906 C. S. SHERRINGTON *Integr. Action Nerv. Syst.* 130 There exist... two primary distributions of the receptor organs, each a field in certain respects fundamentally different from the other. The surface field lies freely open to the numberless vicissitudes of the environment... This field, extero-ceptive as it may be called, is rich in the number and variety of receptors which adaptation has evolved in it. *Ibid.* The reaction of the animal to stimulation of one of its extero-receptors excites certain tissues, and the activity thus produced in these latter tissues excites in them their receptors, which are proprio-receptors. 1927 HALDANE & HUXLEY *Anim. Biol.* I. 24; v. 123.

Extinction. Add: 5. **Petrography**. (See quots.) So **Extinguished** a.

1882 GEIKIE *Text-Book Geol.* 183 In searching for the crystallographic system to which a mineral in a microscopic slide should be referred, attention is given to the directions in which the mineral appears dark, in other words, to the directions of its extinction, between crossed Nicols. It is extinguished when two of its axes of elasticity for vibrations of light coincide with the principal sections of the two prisms. 1912 tr. *Weissenh's Petrogr. Meth.* 67 Maximum brightness is obtained when the vibration directions of the crystal are at 45° to those of the nicols. It diminishes upon further rotation and passes gradually over into complete darkness when these directions are respectively parallel. This latter position is also called the position of extinction, and the vibration directions in the crystal, the extinction directions. *Ibid.* 71 Extinction is of especial importance in the investigation of cleavage pieces. *Ibid.* 70 Extinction Curve for Diopside. *Ibid.* In triclinic minerals the determination of the extinction angles is of value only when the orientation of the face upon which they are observed is accurately known. 1921 A. HOLMES *Petrogr. Meth.* 126 When a transparent mineral fragment is rotated between crossed nicols various phenomena may be observed according to the nature of the mineral and the orientation of the fragment. If the object remains dark, and is therefore isotropic, the total extinction indicates an amorphous or cubic (isometric) mineral in an unstrained condition, or a basal section of a uniaxial mineral (tetragonal, hexagonal, or trigonal). *Ibid.* Except by rare coincidence in all sections of triclinic crystals, the extinction is neither parallel nor perpendicular to the crystallographic axes, but is inclined to the... such direction and the nearest extinction is the extinction-angle.

Extinguisher. 3. Add: **extinguisher-shaped** adj.; **extinguisher moss**, a moss whose peristome closes inwards when touched by water.

Extra, a., adv., and sb. Add: A. adj. e. Cricket. **Extra cover** (point), a fieldsmen whose position is between cover-point and mid-off, but more distant than either from the batsman's wicket; also, his position in the field.

1897 RANJITSINGHI *Jubilee Bk. Cricket* ii. 50 There is no need to treat extra-cover separately. The position is a cross between cover and mid-off, and its duties are a mixture of the duties required in those two places. 1897 *Encycl. Sport* I. 217 Extra cover point. *Ibid.* For slow and medium paced

bowling, a man at long on and extra cover is almost necessary. 1911 *Warner Bk. Cricket* 74. I prefer to see him at cover or extra-cover.

1864 HAAS *Rep. Form. Canterbury Plains* 19 The term 'delta' in geology is confined to the alluvial deposits of a river at its mouth, falling either into the sea or into a lake; but thinking that giving such a name to the alluvial accumulations of the rivers in this island, showing some peculiarities, would impart an erroneous impression, Dr. Hector and myself, in drawing up a synopsis of the geological formations of New Zealand, have adopted for the formation of those subaerial accumulations the expression 'Fan', for those of regular water-courses; and of 'Half-cone', for those of intermittent mountain torrents, and we shall for the future use these two expressions. 1873 F. DREW in *J. Geol. Soc.* XXIX. 416 At the mouth of each of these [gorges] are alluvial fans, which project out into the flat of the river-alluvium. *Ibid.* 447 The fan is properly a flat cone, having its apex at the mouth of the ravine. *Ibid.* 448 The only difference of form between an alluvial fan... and the fan talus sketched in fig. 2 is in the degree of slope. *Ibid.* 455 The course of these fans was, that after the formation of that fan the main events was, that bed, cutting through its own alluvium; river lowered its bed, cutting through its fan. 1883 H. MILLER in *Proc. R. Phys. Soc.* VII. 290 Fan Terraces, or Lateral Delta Terraces. 1890 GILBERT in *U.S. Geol. Survey Monograph* I. 81 *footnote*. The 'alluvial fan' of Drew is the 'alluvial cone' of American Geologists, and Drew is there would be some reason for preferring 'fan' to 'cone' if it were necessary to employ a single term only. It is if it were necessary to use them as synonyms, employing 'cone' convenient to use them as synonyms, employing 'fan' when it is low, when the angle of slope is high and 'fan' when it is low. 1902 in *Ld. Fatigue, sb. Add:

1. c. *Physics*. *Fatigue of elasticity*, *elastic fatigue*, etc.: see **quots.**

1892 G. F. Barker *Physics* 143 A curious phenomenon called the 'fatigue of elasticity' has been observed in solids which shows very clearly the effect of molecular friction. When a wire is vibrated torsionally, there is always a displacement of the zero-point to one side or the other, according to the direction of the original torsion; this disturbance requiring hours or even days for its disappearance. If the wire be kept vibrating, however, the molecular friction is greatly increased. 1899 *Nature* 6 July 239/2 Experiments on an iron wire... showed distinct fatigue of elasticity. 1922 *Glazebrook's Dict. Applied Physics* II. 505/1 Photoelectric Fatigue.—The photoelectric activity of a metal surface which has been freshly polished diminishes as the time that has elapsed since the metal was polished is increased. This is known as the 'fatigue' of the Hallwachs effect.

1900 W. P. Lombard in W. H. Howell's *Text-bk. Physiol.* (ed. 2) II. 70 The fatigue which results from functional activity has, therefore, a twofold cause, the decrease in energy-holding compounds available for work and the accumulation of poisonous waste matters.

By fecundity I mean the demonstrated capability to bear children; it implies the conditions necessary for conception in the women of whom its variations are predicated... In short, fertility implies fecundity, and also introduces the idea of number of progeny; while fecundity simply indicates the quality without any superadded notion of quantity. 1904 *Brit. Med. Jnl.* 23 Apr. 769 A difference is drawn between fecundity and fertility. Thus women of Irish birth in Australia are less fecund than women born either in New South Wales or in Scotland, but they are more fertile. In other words fewer Irish women have children, but to those who are fecund more children are born.

This operation is several times repeated, with the final result that the last anode (positive plate) has a thick coating of dark brown lead peroxide, while the last cathode (negative plate) is coated mainly with metallic lead of a greyish colour in a porous spongy condition, readily acted on by the SO₄ during discharge. The process is known as 'forming' the plates.
